Subject Index of Volume 227

Aluminium
  structure and electromigration behaviour of aluminium films deposited by the partially ionized beam technique, 54
Amorphous materials
  growth morphology and crystallinity of Sb–M (M = Ag, Au, Sn, Pb, Te) codeposited layers, 138
  network structure of r.f.-sputtered amorphous $AlPO_4$–MgO and $AlPO_4$–CaO films, 133
  position of the fundamental absorption edge and activation energies for thermally activated electrical conductivity in amorphous carbon layers, 74
Anisotropy
  optimization of the anisotropy of composite MoS_2 films, 90
Antimony
  growth morphology and crystallinity of Sb–M (M = Ag, Au, Sn, Pb, Te) codeposited layers, 138

Biomaterials
  electrical conduction of polypyrrole in Langmuir–Blodgett films fabricated chemically on ferric stearate substrates, 105
Borides
  spectroscopic studies of BN films deposited by dynamic ion mixing, 44

Cadmium sulphide
  effect of post-deposition treatments on morphology, structure and opto-electronic properties of chemically deposited CdS thin films, 190
Carbon
  position of the fundamental absorption edge and activation energies for thermally activated electrical conductivity in amorphous carbon layers, 74
Ceramics
  thermally assisted hydroxyapatite obtained by pulsed-laser deposition on titanium substrates, 32
Chemical vapour deposition
  characterization of zirconium dioxide film formed by plasma enhanced metal–organic chemical vapor deposition, 7
  effect of the deposition temperature on the iridium film microstructure produced by metal–organic chemical vapor deposition: sample characterization using X-ray techniques, 144
  SIMS depth profiles study of W–Si structures produced via the silicon reduction of tungsten hexafluoride, 167
Clusters
  kinetic model of vapour-deposited thin film condensation: nucleation stage, 111
  microscopic theory of epitaxial film growth in vicinal surfaces, 119
Coatings
  magnetic and magneto–optical properties of Cu-doped Bi, Al: DyIG films prepared by the pyrolysis method, 196
  spectroscopic studies of BN films deposited by dynamic ion mixing, 44
Condensation
  kinetic model of vapour-deposited thin film condensation: nucleation stage, 111
Conductivity
  effect of post-deposition treatments on morphology, structure and opto-electronic properties of chemically deposited CdS thin films, 190
  electrical conduction of polypyrrole in Langmuir–Blodgett films fabricated chemically of ferric stearate substrates, 105
  photoelectrical properties of $CuInSe_2$, 177
Copper
  evaluation of Ta, Ti and TiW encapsulations for corrosion and diffusion protection of Cu interconnects, 37
  magnetic and magneto–optical properties of Cu-doped Bi, Al: DyIG films prepared by the pyrolysis method, 196
Corrosion
  evaluation of Ta, Ti and TiW encapsulations for corrosion and diffusion protection of Cu interconnects, 37
Crystallization
  growth morphology and crystallinity of Sb–M (M = Ag, Au, Sn Pb, Te) codeposited layers, 138
  structures and nonlinear optical properties of 4-(*N*,*N*-dimethylamino)-3-acetamidonitrobenzene films prepared by vapor deposition, 181

Deposition process
  growth morphology and crystallinity of Sb–M (M = Ag, Au, Sn, Pb, Te) codeposited layers, 138
  thermally assisted hydroxyapatite obtained by pulsed-laser deposition on titanium substrates, 32
Diffusion
  evaluation of Ta, Ti and TiW encapsulations for corrosion and diffusion protection of Cu interconnects, 37

Electrical properties and measurements
  electrical conduction of polypyrrole in Langmuir–Blodgett films fabricated chemically on ferric stearate substrates, 105
  optimization of the anisotropy of composite MoS_2 films, 90
  position of the fundamental absorption edge and activation energies for thermally activated electrical conductivity in amorphous carbon layers, 74
  stability of RuO_2 thin film resistors, 59
Electromigration
  structure and electromigration hehaviour of aluminium films deposited by the partially ionized beam technique, 54
Electron diffraction
  cross-sectional transmission electron microscopy of thin film polycrystalline semiconductors by conventional microtomy, 18
Electron microscopy
  cross-sectional transmission electron microscopy of thin film polycrystalline semiconductors by conventional microtomy, 18
  formation of iron oxide films from stabilized magnetite sols—magnetic liquids, 128
  structures and nonlinear optical properties of 4-(*N*,*N*-dimethylamino)-3-acetamidonitrobenzene films prepared by vapor deposition, 181
Epitaxy
  large-area epitaxial CeO_2 buffer layers on sapphire substrates for the growth of high quality $YBa_2Cu_3O_7$ films, 200
  microscopic theory of epitaxial film growth on vicinal surfaces, 119
Evaporation
  dependences of titanium silicide properties on the ratio of silicon to titanium used for electron-beam coevaporation onto heated substrates, 153

growth of large-area $YBa_2Cu_3O_{7-x}$ films by activated reactive evaporation, 95
spectroscopic studies of BN films deposited by dynamic mixing, 44

Fluorescence
dansyldihexadecylamine as a polarity sensitive probe in air–water monolayers and Langmuir–Blodgett films immersed in aqueous solution, 211

Grain boundary
structure and electromigration behaviour of aluminium films deposited by the partially ionized beam technique, 54
ZnS–ZnTe alloy films: preparation and properties, 66
Growth mechanism
in-situ transmission electron microscopy observation of the phase transition in thin films of the Al–Mn system, 24
microscopic theory of epitaxial film growth on vicinal surfaces, 119

Heat treatment
in-situ transmission electron microscopy observation of the phase transition in thin films of the Al–Mn system, 24

Inorganic compounds
network structure of r.f.-sputtered amorphous $AlPO_4$–MgO and $AlPO_4$–CaO films, 133
Insulators
growth of $SrTiO_3$ thin films by pulsed-laser deposition, 100
Ion bombardment
spectroscopic studies of BN films deposited by dynamic ion mixing, 44
structure and electromigration behaviour of aluminium films deposited by the partially ionized beam technique, 54
Iridium
effect of the deposition temperature on the iridium film microstructure produced by metal–organic chemical vapour deposition: sample characterization using X-ray techniques, 144
Iron oxide
formation of iron oxide films from stabilized magnetite sols—magnetic liquids, 128

Langmuir–Blodgett films
dansyldihexadecylamine as a polarity sensitive probe in air–water monolayers and Langmuir–Blodgett films immersed in aqueous solution, 211
electrical conduction of polypyrrole in Langmuir–Blodgett films fabricated chemically of ferric stearate substrates, 105
optical second-harmonic generation in Langmuir–Blodgett monolayers of *N*-octadecyl-2,4-dinitro-5-fluoroaniline, 205
Laser irradiation
metal oxide layer growth under laser irradiation, 13
thermally assisted hydroxyapatite obtained by pulsed-laser deposition on titanium substrates, 32
Lead telluride
growth of $PbSe_{0.78}Te_{0.22}$ lattice-matched with BaF_2, 185
Liquid phase epitaxy
growth of $PbSe_{0.78}Te_{0.22}$ lattice-matched with BaF_2, 185

Magnetic properties and measurements
magnetic and magneto–optical properties of Cu-doped Bi, Al: DyIG films prepared by the pyrolysis method, 196
Metal–oxide semiconductor structures
characterization of zirconium dioxide film formed by plasma enhanced metal–organic chemical vapor deposition, 7
Metallization
evaluation of Ta, Ti and TiW encapsulations for corrosion and diffusion protection of Cu interconnects, 37
Metals
metal oxide layer growth under laser irradiation, 13
Monolayers
dansyldihexadecylamine as a polarity sensitive probe in air–water monolayers and Langmuir–Blodgett films immersed in aqueous solution, 211
optical second-harmonic generation in Langmuir–Blodgett monolayers of *N*-octadecyl-2,4-dinitro-5-fluoroaniline, 205
Mossbauer spectroscopy
formation of iron oxide films from stabilized magnetite sols—magnetic liquids, 128
Multilayers
dansyldihexadecylamine as a polarity sensitive probe in air–water monolayers and Langmuir–Blodgett films immersed in aqueous solution, 211

Nucleation
kinetic model of vapour-deposited thin film condensation: nucleation stage, 111
microscopic theory of epitaxial film growth on vicinal surfaces, 119

Optical properties
position of the fundamental absorption edge and activation energies for thermally activated electrical conductivity in amorphous carbon layers, 74
ZnS–ZnTe alloy films: preparation and properties, 66
Oxides
growth of $SrTiO_3$ thin films by pulsed-laser deposition, 100
large-area epitaxial CeO_2 buffer layers on sapphire substrates for the growth of high quality $YBa_2Cu_3O_7$ films, 200
metal oxide layer growth under laser irradiation, 13
stability of RuO_2 thin film resistors, 59

Phase transitions
in-situ transmission electron microscopy observation of the phase transition in thin films of the Al–Mn system, 24
kinetic model of vapour-deposited thin film condensation: nucleation stage, 111
Phosphorus
network structure of r.f.-sputtered amorphous $AlPO_4$–MgO and $AlPO_4$–CaO films, 133
Photoconductivity
photoelectrical properties of $CuInSe_2$, 177
Physical vapour deposition
growth of large-area $YBa_2Cu_3O_{7-x}$ films by activated reactive evaporation, 95
structures and nonlinear optical properties of 4-(*N*,*N*-dimethylamino)-3-acetamidonitrobenzene films prepared by vapor deposition, 181
Plasma processing and deposition
characterization of zirconium dioxide film formed by plasma enhanced metal–organic chemical vapor deposition, 7
growth of large-area $YBa_2Cu_3O_{7-x}$ films by activated reactive evaporation, 95
Pyrolysis
magnetic and magneto–optical properties of Cu-doped Bi, Al: DyIG films prepared by the pyrolysis method, 196

Raman scattering
ZnS–ZnTe alloy films: preparation and properties, 66
Resistivity
optimization of the anisotropy of composite MoS_2 films, 90

Ruthenium
stability of RuO_2 thin film resistors, 59

Scanning electron microscopy
effect of post-deposition treatments on morphology, structure and opto-electronic properties of chemically deposited CdS thin films, 190
Second harmonic generation
optical second-harmonic generation in Langmuir–Blodgett monolayers of *N*-octadecyl-2,4-dinitro-5-fluoroaniline, 205
structures and nonlinear optical properties of 4-(*N*,*N*-dimethylamino)-3-acetamidonitrobenzene films prepared by vapor deposition, 181
Secondary ion mass spectrometry
SIMS depth profiles study of W–Si structures produced via the silicon reduction of tungsten hexafluoride, 167
Selenides
cross-sectional transmission electron microscopy of thin film polycrystalline semiconductors by conventional microtomy, 18
Semiconductors
cross-sectional transmission electron microscopy of thin film polycrystalline semiconductors by conventional microtomy, 18
growth of $PbSe_{0.78}Te_{0.22}$ lattice matched with BaF_2, 185
photoelectrical properties of $CuInSe_2$, 177
ZnS–ZnTe alloy films: preparation and properties, 66
Silicon
dependences of titanium silicide properties on the ratio of silicon to titanium used for electron-beam coevaporation onto heated substrates, 153
SIMS depth profiles study of W–Si structures via the silicon reduction of tungsten hexafluoride, 167
Solar cells
photoelectrical properties of $CuInSe_2$, 177
Sputtering
large-area epitaxial CeO_2 buffer layers on sapphire substrates for the growth of high quality $YBa_2Cu_3O_7$ films, 200
network structure of r.f.-sputtered amorphous $AlPO_4$–MgO and $AlPO_4$–CaO films, 133
stability of RuO_2 thin film resistors, 59
Structural properties
effect of the deposition temperature on the iridium film microstructure produced by metal–organic chemical vapour deposition: sample characterization using X-ray techniques, 144
growth of $SrTiO_3$ thin films by pulsed-laser deposition, 100
Superconductivity
growth of large-area $YBa_2Cu_3O_{7-x}$ films by activated reactive evaporation, 95
growth of $SrTiO_3$ films by pulsed-laser deposition, 100
large-area epitaxial CeO_2 buffer layers on sapphire substrates for the growth of high quality $YBa_2Cu_3O_7$ films, 200
Superlattices
optimization of the anisotropy of composite MoS_2 films, 90

Titanium
dependences of titanium silicide properties on the ratio of silicon to titanium used for electron-beam coevaporation onto heated substrates, 153
Transmission electron microscopy
in-situ transmission electron microscopy observation of the phase transition in thin films of the Al–Mn system, 24
Tungsten
SIMS depth profiles study of W–Si structures produced via the silicon reduction of tungsten hexafluoride, 167

X-ray diffraction
effect of the deposition temperature on the iridium film microstructure produced by metal–organic chemical vapour deposition: sample characterization using X-ray techniques, 144
formation of iron oxide films from stabilized magnetite sols—magnetic liquids, 128
growth of $PbSe_{0.78}Te_{0.22}$ lattice-matched with BaF_2, 185
X-ray emission
effect of post-deposition treatments on morphology, structure and opto-electronic properties of chemically deposited CdS thin films, 190

Zirconium
characterization of zirconium dioxide film formed by plasma enhanced metal–organic chemical vapor deposition, 7
